### RIVALRY AMONG THE PUSH CARTS

There is an aged fellow who for the past six years has sold fruit and candy from a child's gocart parked beneath the window of my office. When I first came into my present occupation he was a hale old chap who trudged manfully along the street, and the cart seemed beneath the dignity of this mellow Italian-American whose booming voice could often be heard for several blocks when a rival appeared on the scene. He brooked no competition and the fury of his invective drove away even the boldest. The police did not allow him to sit, for this violates the law of the sidewalk, but once in a while he would perch on the running board of a car parked nearby. Then when running boards, like trouser cuffs, disappeared for the duration, his legs began to fail. Once I offered him an English sitting cane, the kind used at the races by swank fellows and by horsey women attired in sport clothes and field glasses, but he would have none of it and he waved me away indignantly.

Now he is really old and feeble. His stock gets smaller and his hours are shorter. Today I thought that he would not last another week, so halting was his gait. Even as I thought that, a young rival peddling ice cream appeared at the curb, prepared to do business under the fruit vendor's nose. Instantly his wrath became audible and what was more, visible. He flung Italian oaths in a high pitched treble and his white locks rose like the hackles of some fierce dog. He may have yelled a lusty Corpo di Baccho for all I know, but his fury did the business, for the ice cream man folded his tent and slunk off. When I turned away, the ancient gent was yowling and grumbling like a querulous old hound whose domain had been invaded by some upstart puppy. The patriarch is probably good for some time yet and I am planning to buy my fruit from him on the way home. I may even address him as Padr6ne. At all events, he seems to be boss around here.
